Certified Asterisk® Training

Asterisk Fast Start

Asterisk Fast Start is a three-day hands-on course designed to equip you with the knowledge and skills necessary for an entry-level Asterisk Administrator to be successful on the job.

Using a combination of information-rich lectures and practical lab exercises, this course familiarizes you with Asterisk and the environment in which it operates, both in terms of operating system and telephony (traditional and IP) connections. This course will take you from a freshly installed Linux PC through to a fully configured and working Asterisk implementation. You do not need to have previous experience with Linux, telephony or Asterisk.

Fast Start Course Format

- Identify the purpose and primary functionality of Asterisk as a PBX and as an application development platform

- List the functionality associated with a traditional PBX

- Understand the history of Asterisk and its powerful open source community

- Define the operating system environments in which Asterisk is developed and supported

- Describe the telephony connections which Asterisk supports and identify the Digium hardware needed to enable this connectivity

- Identify the basic characteristics of analogue and digital PSTN connections and how VoIP compares and contrasts with these

- Install and run Asterisk from the packages available for download from www.asterisk.org

- Configure Asterisk to deliver basic PBX functionality, including basic call routing, voicemail and directory services

- Learn the basics of Linux in order to be an effective Asterisk administrator

Class Materials and Cool Stuff

The following Digium hardware and course materials are included in the cost of the course:

- Digium TDM411B Analog card (1 FXO port + 1 FXS port)
- Digium TE122P T1/E1/J1 card
- SIP Desk Phone

Is this the right class for me?

Asterisk Fast Start functions as part 1 of the Asterisk Fast Start/Asterisk Advanced combination. It provides the essential knowledge needed in order to succeed in the Asterisk Advanced Class.
To help you determine which class will be most helpful to you, you may take the free, online dCAA certification test (http://www.digium.com/en/training/asterisk/certifications/dcaa).

If you pass this test then you are most likely ready for the Asterisk Advanced Class. If not, then Asterisk Fast Start or Asterisk Essentials should be completed prior to taking Asterisk Advanced.

Prerequisites

This is an entry-level course; there are no prerequisites to attend this training.
