Deliver proactive threat landscape analyses and dark web monitoring

Incident Management

Planning, executing and testing incident response processes

Root cause analysis

SOC integration for real-time detection & response

Awareness Education

Tailored security awareness training

Executive workshops

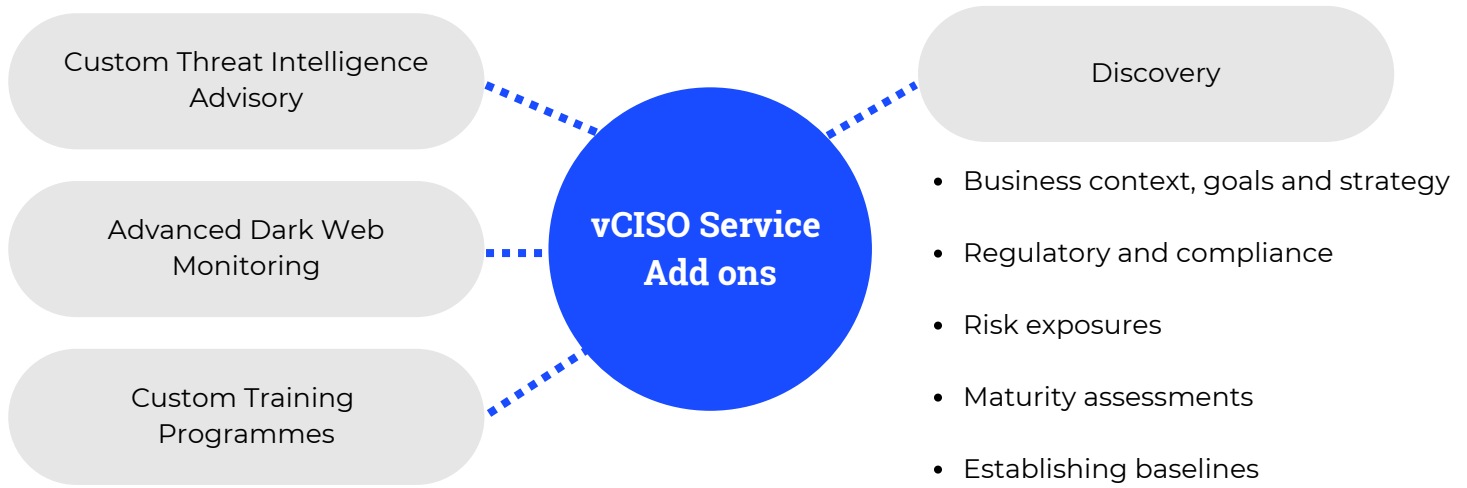

Lunch and learn sessions

Why use a vCISO service?

A CISO service delivers executive-level cybersecurity leadership on a flexible, on-demand basis, providing organisations with the strategic expertise of a full-time CISO without the associated high costs.

By engaging a vCISO, companies can ensure that their cybersecurity strategies are tightly aligned with their overall business goals while maintaining rigorous protection against evolving threats.

SOC services - Enhancing your vCISO outcomes

Our Security Operations Centre (SOC) services are seamlessly integrated with our vCISO offerings to deliver comprehensive, real-time protection for your organisation

SOC Capabilities	Security Architecture Evaluation	<ul style="list-style-type: none"> Continuous assessment of security controls and frameworks Recommendation integrated into the vCISO's roadmap 	vCISO Outcomes
	Automation and Analytics	<ul style="list-style-type: none"> Leverage AI/ML to predict and mitigate risks Outputs includes in the vCISO's monthly executive reports 	
	Vulnerability Management	<ul style="list-style-type: none"> Regular scans to identify and remediate vulnerabilities Actionable insights fed into the risk management process 	
	Managed Detection and Response (MDR)	<ul style="list-style-type: none"> Real-time monitoring of endpoints, network and cloud Incident alerts escalated to vCISO for strategic response 	
	Identity and Access Management	<ul style="list-style-type: none"> Implementation and monitoring of MFA, PAM and SSO Governance aligned with vCISO's compliance objectives 	

 From real-time defense to strategic insight
Unified Security Leadership

SOC and vCISO integration

 **Incident Response**

The SOC provides first-line detection while the vCISO oversees incident management and process improvements.

 **Threat Intelligence**

The SOC feeds insights into the vCISO's threat landscape analyses and strategy development.

 **Reporting**

SOC operational metrics are integrated into the vCISO's dashboards and executive updates.
